SN

Meets the stringent hygienic requirements of European norm EN 1672-2.

- Stainless Steel construction.
- Containerized main spring for safe, easy maintenance.
- Four roller guide to protect hose.
- Stainless steel fluid path.
- Ratchet lock and easy tension adjustment
- Easy to clean and service. Designed with a minimum of joints and with all surfaces smooth and sloping (in accordance with European norm EN 1672-2). Regarded as a piece of food processing equipment, SN Series meets all known hygienic demands from the industry and should be serviced according to current procedures.
